## SUMMARY

Junior, Skilled and continuous reader Front-End Developer proficient in Web development.

Since May 2023, I've immersed myself in front-end development, building projects and apps and focusing on creating user-friendly and performant web applications and Web Architecture with integration with Backend

Eager to contribute to a collaborative team environment.

## EDUCATION

### Faculty of science – Physics department (Bachelor degree)          08/2016 - 05/2021

From Damanhour university – GPA: 2.57

I studied some theories of physics, Statics, Dynamics and Electronics.

All of Mathematics branches. like (Statistics and Probability, Differential Equations, Mathematical Physics, Computational Mathematics, Matrix, and more)

## TRAINING AND COURSES

### Software Testing Training          10/2024 - 05/2025

From Digital Egypt Builders initiative (DEPI) – Ministry of communication

Took Programming language (Java), Database SQL, ISTQB.

Types of software testing like (manual, automation), White box, Black box

And using tools like Jira(Scrum and Kanban) with Agile methodology.

### API Test Automation Course (Postman)          12/2024 - 01/2025

Online from Postman

Testing the API response by applying some assertions and scripting on the response body

Validating JSON Schema, Headers, Authentication, expected response data type

and integrating the script into CI/CD server.

The Ultimate React Course 2024: React, Next.js & More          02/2024 - 09/2024

      Online from Udemy by instructor Jonas

      React, NEXT.js, Redux-toolkit, Firebase, applying some projects with tailwind

Fundamentals of Database (SQL) Course          06/2024 - 07/2024

      Online from Mahara-Tech.

      Understood ERD, ERD mapping tables, DDL, DML, Queries and normalization.

# SKILLS

## Programming world

Java, JavaScript, TypeScript, OOP, SOLID principles Data Base (SQL), Data Structure, Algorithm, Problem Solving, Git and GitHub, Jira (Scrum and Kanban), clean, reusable code, System design and Design Pattern.

## Front End and Frameworks

HTML5, CSS3, React, NEXT.js, Bootstrap, Tailwind, Redux, Hooks, Axios
Pre-processor (SASS), Webpack, Integration with backend, pixel perfection, UI/UX

## Web Knowledge

SEO, web performance and Lighthouse, Responsive innovative Web Screens, CORS, Client slide and Server side.

## Software testing

Automation, Manual, Tests of API, Performance, Stress, Load, functional, non-functional.
